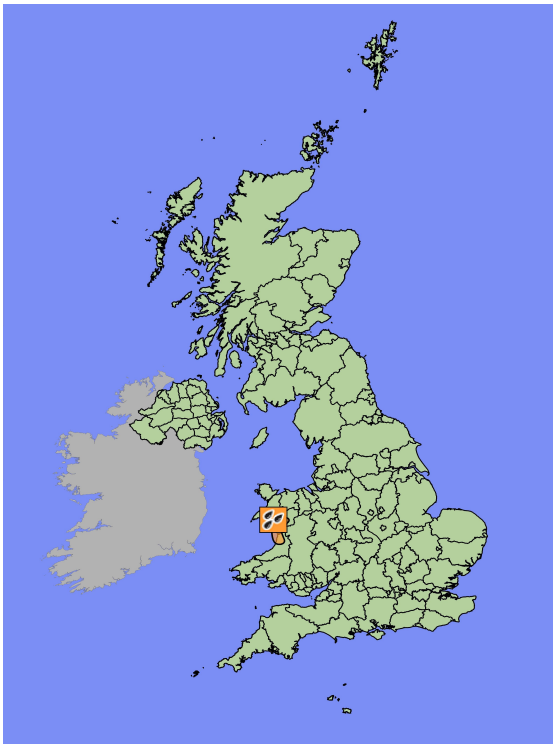
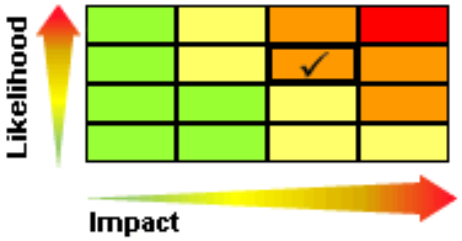
National Severe Weather Warning Service





Chief Forecasters Assessment
Further active frontal systems with outbreaks of rain and strong to gale force winds will move eastwards across west Wales during Saturday. Some of the rain will be heavy with many areas seeing an additional 30 to 40 mm and 60 mm or more possible over high ground.

The Met Office have issued an **Amber Warning** of **Rain**

Valid from **10:00 on Sat, 22nd Dec 2012** until **23:59 on Sat, 22nd Dec 2012**

Further bands of heavy rain accompanied by strong winds are expected to move across parts of west Wales during Saturday. Given that the ground is already saturated from earlier rain and rivers are high, the public should be prepared for the risk of localised flooding from both rivers and surface water. This could well lead to disruption to travel.
